

The Building Buzz

A Warm Winter Welcome!

Welcome to our very first issue of **The Building Buzz!** It's hard to believe February is here already and, though it's early days, 2010 is shaping up to be a great year for us.

We've had lots of great interest in both our Log and **Hybrid Building System** packages so we know things are changing and the economy is turning around. It's going to be a busy year!

Talking about our **Hybrid Building System**, did you know homes produced with this system are a cost effective and great alternative to a log home? It's also hard to believe Hybrid homes can be assembled, and are virtually closed to weather, in just a few days!

Read about "Starlight", our

newly completed Hybrid Home near The Blue Mountains in the article below.

If you would like to find out more about any of our products, give us a call or drop us an email. We're looking forward to hearing from you!

The team & I wish you all a prosperous and safe 2010.

Sincerely,

Milan Smeh

"Starlight" A Hybrid Building System Model Home

Close to the Blue Mountains and nestled among the trees of the Niagara Escarpment, you'll find Starlight, our newly completed 2,000 Sq. Ft. **Hybrid Building System (HBS)** model home.

Our **HBS** homes are a cost effective alternative to both solid log wall construction and typical "stick" built houses. Homes are fabricated, engineered and built in panel form to very high standards in our Collingwood, ON, facility. They are integrated with a full Post & Beam structure and topped with our energy efficient **Synergy Roof Panels**. **HBS** homes are very versatile with the choice of exterior siding as well as many other design options.

Like all **HBS** homes, Starlight features cathedral ceilings and an open concept design. We've finished the interior with a designer kitchen and wide plank pine flooring and slate throughout in keeping with the "natural" look of a log home.

Starlight is available for viewing by appointment so why not swing by on your way to ski country or while touring the Georgian Bay Area. Ask us for a copy of our slide show demonstrating the construction of a **Hybrid Building System** home or visit our website, www.hybridbuildingsystem.com - we would love to hear from you!

Harmonized Sales Tax Savings

If you're building in Ontario there's still time to purchase one of our packages before the Harmonized Sales Tax is implemented. This is a great way to save money on the overall cost of your project. The Harmonized Sales Tax (13%) will be introduced on July 1st, 2010.
