

Legendary Logcrafters Ltd.
Spring 2010
Volume 1, Issue 2

The Building Buzz

Work in the Legendary factory sprang into high gear just about the time the clocks moved forward in March.

As I write this issue of the Building Buzz, part of my team is in Knowlton, QC delivering & constructing a Hybrid commercial structure. The rest of the team is in Collingwood working on an elaborate gazebo for delivery in Killarney, ON. We're also starting work on a Scandinavian log home that's heading for upstate New York.

There are clear indicators that things have tuned for the better. We had a successful Spring Cottage Life Show in Mississauga, ON in March. Our log homes were as popular as ever and there was **TREMENDOUS** interest in our Hybrid Building System.

We are VERY excited that we can offer

a quick, smart and cost effective way for you to get the 'Post & Beam' home of your dreams. Remember, we offer tours of Starlight, our model home, near The Blue Mountains by appointment. Why not come up for a visit this Spring?

Milan Smeh Milan Smeh, President

Q & A

Q. Why do you use Eastern White Pine logs?

A. We use Eastern White Pine exclusively because of its superior log building characteristics. It's extremely stable with 50% less shrinkage than most other softwoods meaning less settling & checking. With a higher R-value than most commonly used softwoods, it also increases energy efficiency in our homes. Eastern White Pine - your Legendary advantage!

Upcoming Events

- Hybrid commercial structure delivery in Knowlton, Quebec
- Elaborate gazebo delivery in Killamey, Ontario
- Scandi log home delivery in Bolton Landing, New York
- Starlight Grand Opening

Plan Profile: TheMountvista

Our latest plan, the Mountvista, offers exceptional space at 1,928 Sq. Ft. and room for all. The open plan Great Room, Dining Room & Kitchen combination also make for easy entertaining.

As with all of our plans, we can customize Mountvista incorporating your unique design ideas and requirements. We can also build with our Hybrid Building System or in one of our three log profiles (Scandi, 8" x 14" Dovetail, 10" Premier Dovetail). The possibilities are endless for your dream home!
