

You can see from our Project List and photos that weather & winter aren't slowing us down. In this edition we're also featuring our Mountainview Plan while we begin thinking of new designs to add to our portfolio. If there is a design you would like us to have a look at please drop us a line. Milan Smeh

Plan Focus - The Mountainview

2,111 Sq. Ft - 3 Bedrooms - 2.5 Baths

Why do we like this plan? The master suite on the main level offers maximum privacy from the rest of the house. The great room - dining room - kitchen combo is great for entertaining family and friends and offers a wonderful open concept living space with a cathedral ceiling over the great room.
